Delve Deeper into "Bright Leaves"
A film by Ross McElwee

This multi-media resource list, compiled by Mary Cella of the St. Charles Public Library in partnership with the American Library Association, provides a range of perspectives on the issues raised by the upcoming P.O.V. documentary "Bright Leaves" that premieres on August 23rd, 2005 at 10 p.m. on PBS (check local listings at www.pbs.org/pov/).

What legacy is passed down to generations when a family is a giant tobacco producer? Filmmaker Ross McElwee (Sherman's March, "Time Indefinite" – P.O.V. 1994), whose great-grandfather created the famous Bull Durham brand in his native North Carolina, takes viewers on an autobiographical journey across that state's social, economic and psychological tobacco terrain. Wise and wry, this meditation on the allure of cigarettes looks at loss and preservation, addiction and denial. "Bright Leaves" also examines filmmaking itself, as McElwee grapples with home movies, a vintage Hollywood melodrama and his own efforts to document North Carolina and his family.
