New (Other). C $12.52. For me this book defines the genre -- it is the most outstanding book on innovative shelter I have ever read. The authors give extensive details. A single example is the illustration of how to get 1000 pounds of logs to your remote site: balanced across 2 canoes! The authors define many building techniques that are never discussed in "how to build your house" books because those books assume that you have power tools, ready access to a lumber supply, and in all probability the need to satisfy building inspectors. Build It Yourself: Weekend Projects for the Garden will help you to do just that. Accompanying you every step of the way, from the local home goods store to your workshop or table, Build It Yourself is a fun, accessible, and portable guide to constructing twelve practical, tasteful projects for your garden and home. Author and master woodworker Frank Perrone instructs with the novice in mind. Each project is designed for simple building, complete with a materials list, a cut sheet that makes getting lumber a snap, dimensional diagrams, illustrated step-by-step instructions with attention to ev
