Creating a bibliography can sometimes be a daunting task. With these examples, learn how to write types of bibliographies in a simple, stress-free way.

Bibliography, Annotated Bibliography or Works Cited? Despite the varying terms, the difference between a bibliography, an annotated bibliography and a works cited page is simple. A works cited page is a list of every work cited in the text of your paper. A bibliography is a list of every work you used while writing your paper, whether or not it was specifically cited.

Previous (Bibliographic database). Next (Bibliothèque nationale de France). Bibliography (from Greek: βιβλιογραφία, bibliographia, literally book writing), as a practice, is the academic study of books as physical, cultural objects; in this sense, it is also known as bibliology. On the whole, bibliography is not concerned with the literary content of books, but rather the physical description, the history of its publications and editions. Fast and free way to automatically generate MLA, APA & Chicago citations, references and bibliographies. Supports In-text citations and multiple formats.

Crafting citations can be painfully tedious. Put the hours spent creating them manually behind you. We're here to take the stress out of citations with our quick, automatic and easy-to-use bibliography maker. Whether you're prepping a simple or annotated bibliography, any project will be top-notch with our MLA, APA and Chicago citation generator.

Start Your Bibliography. A bibliography is a list of books, scholarly articles, speeches, private records, diaries, interviews, laws, letters, websites, and other sources you use when researching a topic and writing a paper. The bibliography appears at the end. The main purpose of a bibliography entry is to give credit to authors whose work you've consulted in your research. It also makes it easy for a reader to find out more about your topic by delving into the research that you used to write your paper. A bibliography, the product of the practice of bibliography, is a systematic list of books and other works such as journal articles. Bibliographies range from "works cited" lists at the end of books and articles to complete, independent publications. As separate works, they may be in bound volumes such as those shown on the right, or computerised bibliographic databases. A library catalog, while not referred to as a "bibliography", is bibliographic in nature.
