This beautifully illustrated guide highlights over 85 species and includes a marine ecoregion map. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Customer Reviews. Review this book. Very good job of showing the tracks of various animals found in north America and descriptions of their size. The author presented good drawings of the animals as well. The only reason I did not give it 5 stars is that he only provided pics of the bird tracks and not the birds themselves. We all know what a crow and a Bald eagle look like, but I don't know the difference between a Dark eyed junco and a Northern Flicker. Read more. 5 people found this helpful. Rgbiks.
